

How to install your GHOST eSIM

Stay **connected** when you land.

We recommend you install your eSIM before you travel and activate it on arrival.
Follow this quick guide for step-by-step instructions.

Just days away from departure?

Installation requires a stable Internet connection.

Install Now

Have you just arrived at your destination?

Activate your eSIM when you reach your destination.

 **Activate on iOS**

 **Activate on Android**

 **Activate on Pixel**

QR Code Installation

- Once payment has been processed, you will see a QR Code on your screen.
- Alternatively on the GHOST eSIM website, login and navigate to Manage Subscriptions.
- You will see a list of your active Subscriptions.
- On the appropriate Subscription/eSIM you wish to install, select “Orders & Invoices” and then “eSIM not installed”. Your QR Code will display.

QR Code Installation

- Using your mobile device, scan the QR code.
- Tap on Mobile Plan.
- Accept and continue all prompts.

Your eSIM is now installed.

IOS: Important!

Once your eSIM is installed, it's ready for use. If you haven't reached your destination yet, simply deactivate it until you do. You may get a message that eSIM activation failed if you are not in a destination supported by your eSIM.

To Deactivate:

- Go to Settings > Mobile Service > Scroll to the SIMs section.
- Ensure your eSIM is switched off.
- Ensure Mobile Data is set to your normal SIM.
- When you arrive at your destination activate it again.

In order to easily identify your eSIM, you may want to rename it.

To Rename your eSIM:

- Go to Settings > Mobile Service > Scroll to the SIMs section.
- Tap on the eSIM you wish to rename
- Tap the eSIM at Mobile Plan Label
- Scroll to and tap on Custom Label to rename it
- Tap Done.

IOS: **Activate** your eSIM

Reminder! Activate your eSIM only when you arrive at your destination.

- Go to Settings > Mobile Service > Scroll to the SIMs section.
- Under SIMs, select the eSIM you wish to activate and toggle Turn On This Line to on.
- Go back to Settings > Mobile Service > Scroll to the SIMs section.
- Select your eSIM and ensure Data Roaming is set to on.

Give your device time to connect. If it doesn't, switch to airplane mode for 30 seconds, then turn it off.

Still no connection? Check the [troubleshooting](#) steps.

***If it displays eSIM "activating", please wait for it to complete.**

IOS: Turn off your eSIM when you return

- Go to Settings > Mobile Service > Scroll to the SIMs section.
- Select the eSIM you wish to deactivate and toggle Turn On This Line to off.
- Go back to Settings > Mobile Service > Scroll to the SIMs section.
- Switch it back to your local SIM.
- Ensure your mobile data is correctly set to your local SIM.

IOS: Troubleshooting

If you are not able to connect to the internet, you may need to update your APN settings. Setting the APN to "globaldata" ensures your device connects to the right network.

- Go to Settings on your device then Mobile Service.
- Select your eSIM under SIMs.
- Go to Mobile Data Network.
- Under Mobile Data, change the APN to globaldata (all lower case, all one word and no space before or after.)
- Leave the other fields blank.
- Attempt to access the Internet to verify connection.
- Turn airplane mode on for 30 seconds, and then off and then wait two minutes and retry.

Still not working? Your phone may be network locked. Please contact your home network provider for assistance in unlocking you device.

Android: Important!

Once your eSIM is installed, it's ready for use. If you haven't reached your destination yet, simply deactivate it until you do. You may get a message that eSIM activation failed if you are not in a destination supported by your eSIM.

To Deactivate:

- Go to Settings > Connections > SIM Manager.
- Ensure your eSIM is switched off.
- Ensure Mobile Data is set to your normal SIM.

When you arrive at your destination activate it again.

In order to easily identify your eSIM, you may want to rename it.

To Rename your eSIM:

- Go to Settings > Connections > SIM Manager.
- Tap the eSIM you wish to edit.
- Tap on Name and name it “KR eSIM” or similar.
- Tap Done.

Android: **Activate** your eSIM

Reminder! Activate your eSIM only when you arrive at your destination.

- Go to your **Settings > Connections > SIM manager**.
- Select the eSIM you wish to activate and toggle it on.
- Select **Mobile Data** and set it to your eSIM.
- Go back to **Settings > Connections**. Then **Mobile Networks**.
- Ensure **Data Roaming** is turned on.

Give your device time to connect. If it doesn't, switch to airplane mode for 30 seconds, then turn it off. Still no connection? Check the [troubleshooting](#) steps.

Android: **Turn off** when you return

- On your Device: Go to Settings and tap on Connections.
- Tap on SIM manager.
- Under eSIMs, toggle your KnowRoaming eSIM off.
- Tap on Mobile Data, switch it back to your local SIM, and ensure your mobile data is correctly set to your local SIM.

Android: Troubleshooting

If you are not able to connect to the Internet, you may need to update your APN settings. Setting the APN to "globaldata" ensures your device connects to the right network.

- On your Device: Go to Settings > Connections > Mobile Networks > Access Point Names (APN).
- Each APN on the list will have a name, and the APN address below it.
- If no options include the APN globaldata, click on Add. Tap on Name and label it esim then tap APN and label it globaldata (no capital letters and no spaces).
- Please ensure the globaldata option is selected if it is already listed.
- Then Tap on the back arrow or Save, depending on your device, and select the APN with the Name esim and the APN globaldata.
- Tap on the back arrow or Save, depending on your device and exit settings.

Still not working? Your phone may be network locked. Please contact your home network provider for assistance in unlocking you device.

Pixel: Important!

Once your eSIM is installed, it's ready for use. If you haven't reached your destination yet, simply deactivate it until you do. You may get a message that eSIM activation failed if you are not in a destination supported by your eSIM.

To Deactivate:

- Go to Settings > Network & Internet > SIMs.
- Ensure your eSIM is switched off.
- Switch your Normal SIM on and ensure Mobile Data is switched on.

When you arrive at your destination activate it again.

Pixel: Important!

To Rename:

- Go to Settings > Network & Internet > SIMs.
- Select the eSIM you wish to edit.
- Tap the pencil icon.
- Rename the eSIM.
- Tap Save.

Pixel: **Activate** your eSIM

Reminder! Activate your eSIM only when you arrive at your destination.

- **Go to Settings > Network & Internet > SIMs.**
- **Select the eSIM you wish to activate and toggle the eSIM to on.**
- **Ensure Data Roaming is switched on.**

**Give your device time to connect. If it doesn't, switch to airplane mode for 30 seconds, then turn it off.
Still no connection? Check the troubleshooting steps.**

Pixel: **Turn off** when you return

- Go to Settings > Network & Internet > SIMs.
- Turn off your KnowRoaming eSIM.
- Toggle on your Normal SIM.
- Ensure Mobile Data is switched on.

Pixel: Troubleshooting

If you are not able to connect to the Internet, you may need to update your APN settings. Setting the APN to "globaldata" ensures your device connects to the right network.

- On your Device: Go to Settings > Network & Internet > SIMs. Ensure the eSIM you want to update is toggled to on and tap on the eSIM. Scroll down to Access point Names
- Each APN on the list will have a name, and the APN address below it.
- If no options include the APN globaldata, click on the + or Add. Tap on Name and label it esim then tap APN and label it globaldata (no capital letters and no spaces).
- Please ensure the globaldata option is selected if it is already listed.
- Tap on Save and ensure the globaldata APN is selected.

Still not working? Your phone may be network locked. Please contact your home network provider for assistance in unlocking your device.

That's **It!**

You're ready to explore the world with seamless connectivity from your **GHOST eSIM**.
